

Important Booking Violation Reminder

Dear Travel Partners,

This is an important reminder to comply with China Airlines' Reservation Policies. We have recently observed an increase in booking violations. China Airlines will continue to monitor GDS booking activities and issue Agency Debit Memos (ADMs) for non-compliant bookings including repeated bookings (Churning), cancellation, and other reservation violations.

To avoid ticketing issues and ADM charges, please note the following:

1. Repeated Segments / Bookings (Churning)

A repeated segment and churning violations occur when the same passenger repeatedly books and cancels the same flight segment (different travel date), either within the same PNR or across different PNRs.

- Maximum allowed: **Four (4) times of booking attempts** per flight segment.
- Penalty: **From the 5th time of booking attempt, an ADM of USD 15 per segment per seat + CAD 35 administration fee** will apply.

2. Cancellation Ratio

If the cancellation ratio against existing departure month bookings reaches **85% (250 segments) or above**.

- Cancellation ratio reaches 85% or higher, and 250 or more flight segments are cancelled.
- Penalty: **an ADM of USD 15 per cancelled segment per seat + CAD 35 administration fee** will apply.

The above ADM policies have been effective since **June 1, 2026**. Please refer to the attached Agency Debit Memo for detailed information.

Thank you for your continued support of China Airlines
