

Signature Required for FedEx Shipment

Important Delivery Information

Shipment Security Protocol

Your upcoming FedEx shipment is scheduled for delivery and requires a signature upon receipt. This is a standard security measure implemented across the FedEx network to ensure the safe delivery of your shipment. Your signature protects your shipment and provides proof of delivery to the sender.

Action Required for Delivery

To successfully receive your shipment, a valid signature is required upon delivery. Please ensure the delivery address is correct and that you or an authorized representative is available to sign for the shipment. If you are unable to sign, please contact FedEx Customer Service for assistance.

If You Are Unavailable

In the event that you are unavailable to sign for the shipment, the FedEx driver will attempt to deliver the shipment to a nearby location. You may also request a signature waiver or a hold for pickup at a FedEx location. For more information, please visit the FedEx website or contact FedEx Customer Service.
